Software Engineering Experience

Hack the Future- Team Lead

September 2021 - Present

- Lead a team of 7 dev's in developing a MERN webapp for a non-profit that organizes grants and creates reports for federal documentation
- Communicate with the non-profit to determine how to best suite the application to their needs
- Facilitate team sprints, debugging sessions, and demos; write project requirements and user stories; and contribute to the codebase

Software Engineering Internship

Clarus Commerce | Jun 2021- Aug 2021

- Collaborated under the Agile methodology with mentors and creative team to implement new website features
- Translated designs into an entirely new page, new page sections, and dynamic CTA's using Less and CSHTML
- Updated URL routing and page navigation in the back-end using C# in the .NET MVC5 framework
- Participated in arch sessions and risk analysis to determine the costs of new features

Set Game Solver

Jan 2021 | (GitHub Link)

- Used Java to create an image recognition program that identifies the shape, color, number of shapes, and shading of game cards to solve a board from the game Set

Education

Expected Graduation- May 2023

- Purdue University- West Lafayette, IN
- Bachelor's of Science in Computer Science
- Current GPA: 4.00

Non-Technical Experience

Junior Youth Empowerment Program

May 2017 - Aug 2021

- Empowered a group of middle school students to view themselves as protagonists in their communities using books, art activities, and sports
